Carolyn's DVDs here and DAK8 see ATTACHMENTS!

Hi all,

I just wanted to let you know that the DVDs have arrived from Carolyn and that I now can get you the DAK8 upgrade if you're interested. Attached you will find a sheet with information on new functions in DAK8 and also an upgrade/purchase form. If you want the upgrade price, you must supply all information on the form and your current disk. Credit card info can be given to me privately if you wish.

The DVDs can be picked up at my house, or I will bring them to the November meeting. If you get upgrade forms to me by next week, I should be able to have your upgrades to you by the November meeting. If you have any questions, just ask!

---

Hi, All.

I find I have no time for knitting any longer so want to sell the machine. The following information covers what is included in the machine parts, but I also have extra small tools, patterns, blocking board, etc. that would be included in the deal:

KH 970 electronic machine

KR850 ribber, with cover

KE100 motor with foot pedal and stand

G-carriage

Garter bar

KRC1000E electronic color changer

KA8310 linker (but I never could get this to work reliably)

I have everything originally in the packing box, including manuals and the original packing boxes, for each of these items. Some of the manuals have notes written in them, but they are whole and in good condition. There are extra needles for both beds and the sponge bar has just been changed. This is a gently used machine that I recently cleaned to be sure all is still working since I have not been knitting for some years.

I'm asking \$3000 but will consider offers. I want some room in my studio and feel the machine should be getting some use from someone who can enjoy it as much as I used to. If you just want to forward this email to members, it's OK for interested knitters to call me at **630-530-5176**. I'm in Elmhurst and easy to reach from all directions.

Regards, Rae McAlpin
